

Arthur Scheidel

Unity Developer and Tech Co-Founder

Paris, France | arthur.scheidel@gmail.com | <https://lacrearthur.github.io/me/> | GitHub: LaCreArthur

SUMMARY

Unity game developer and tech co-founder of Sorolla, focused on mobile publishing infrastructure, Unity SDKs, playable ads, and shipped game systems. Self-taught in Unity and C#, with 20+ games shipped. Background spans hyper-casual mobile work at Ubisoft/Ketchapp, live game development at Celsius Online, Web3 gaming leadership, WebGL/full-stack engineering, independent games, and Unity teaching.

EXPERIENCE

Technical Co-Founder - Sorolla	2024-present
- Building mobile publishing infrastructure for Unity games: publisher SDK work, analytics, iOS ATT handling, ad-network integration, and playable ad pipelines. - Maintains Sorolla Palette SDK as a public Unity package under the Sorolla Studio GitHub organization. - Shipped Happy Snake 3D to the App Store and Google Play.	
Senior Unity and Full-Stack Engineer - YourArt	Feb 2024-Jun 2024
- Optimized Unity WebGL virtual galleries, reducing build size and improving load performance. - Refactored frontend and Unity integration paths to speed feature delivery. - Added backend/API and JavaScript/TypeScript features across authentication, search, admin, and artwork pages.	
Lead Unity Developer - Yumon	Apr 2023-Sep 2023
- Led Unity development for a play-to-earn multiplayer startup game with NFT avatars. - Shipped gameplay, leaderboard, third-party SDK integration work, and mobile login workflows.	
Chief Technology Officer - CARFT	Mar 2022-Apr 2023
- Built and led the technical stack for an NFT car collectibles game with multiplayer features and real-world prize incentives. - Rebuilt a Unity prototype into a robust full-stack, multiplayer, and Web3 system; mentored junior Unity developers.	
Gameplay Programmer - Ubisoft / Ketchapp	Feb 2019-Nov 2019
- Built hyper-casual Unity prototypes and production integrations for mobile publishing tests. - Integrated SDKs, ad networks, analytics, and reusable tooling for rapid soft-launch cycles.	
Game Developer - Celsius Online	Apr 2018-Jan 2019
- Added features and fixed production issues on live mobile games with large installed user bases. - Worked across C++, ActionScript, C#, NodeJS, and platform-specific mobile fixes.	
Independent Game Developer - Bretzel Studio	2015-present
- Built Rody & Mastico Collection, a Unity remaster with an integrated level editor; rebuilt the game's voice synthesis from scratch using the original 1987 phoneme technique. Featured by French YouTubers Bob Lennon and Benzaie. - Created Dogecoin To The Moon / Doge To Mars: 10K+ Google Play installs at a 4.5 rating, grown solo with no paid marketing. - Teaches Unity through practical course projects, including Vampire Survivors-style and tower defense repositories.	

SELECTED WORK

- Sorolla Palette SDK** - Unity mobile publisher SDK. github.com/sorolla-studio/sorolla-palette
- Happy Snake 3D** - Sorolla mobile game, live on App Store and Google Play.
- Unity CI/CD Template** - GitHub Actions, GameCI, Fastlane, Firebase Distribution. github.com/LaCreArthur/unity-fastlane-ci
- Rody & Mastico Collection** - Unity remaster and level editor. lacrearthur.itch.io/rody-mastico-collection

SKILLS

- Unity, C#, C++, Three.js, WebGL, mobile game development
- Mobile SDKs, ATT, ad networks, analytics, ASO, publishing workflows
- GitHub Actions, GameCI, Fastlane, Firebase Distribution
- React, Angular, TypeScript, Python, Firebase
- Game architecture, playable ads, teaching, technical leadership

EDUCATION

- Master's in Computer Science (Software and Knowledge Engineering), with honors, University of Strasbourg - 2017
- Bachelor's in Computer Science, University of Strasbourg - 2015
