linkedin.com/in/arthur-scheidel

Unity and AI engineer, technical co-founder, and startup builder with 20+ shipped games across mobile publishing, Web3 and agentic AI orchestration. I build Unity SDKs, playable ads, compliance and analytics pipelines, and AI-assisted development workflows.

// EXPERIENCE

Technical Co-Founder · Sorolla 2025–now

Technical co-founder developing Sorolla's in-house publishing platform: ad mediation, ATT & CMP, MMP, analytics, GDPR/CCPA compliance, playable ads and release tooling. Agentic AI stack: prompt engineering, MCP/tool use, context engineering, Claude Code, Codex and agent harnesses.

Senior Unity & Full-Stack Engineer · YourArt 2024

Led Unity WebGL gallery and full-stack marketplace work. Reduced WebGL build sizes by 50%, improved scene loading by 30-70%, refactored duplicated Unity projects, and shipped Python API plus JS/TS frontend features across auth, search, admin, artworks and user pages.

Lead Unity Developer · Yumon 2023

Led Unity development for a Web3 gaming startup as part of a 4-person founding team. Built a mobile-first play-to-earn game and B2B SDK platform, moving from prototype to production in 3 months and cutting new-game sprint time from 3-4 weeks to 1 week.

Chief Technology Officer · CARFT 2022–23

Built and led the tech foundation for a blockchain car-collectibles game. Rebuilt a Unity prototype into full-stack multiplayer/Web3 systems, created tools and proofs-of-concept in React, Angular, Firebase, Flutter and Web3, and mentored 5 junior developers.

Gameplay Programmer · Ubisoft / Ketchapp 2019

Early Ketchapp hyper-casual team member. Shipped 15+ mobile game prototypes in 1-2 week cycles, handled SDK/ad-network/analytics integrations for soft launches, and built reusable components that accelerated prototype development by 50%.

Game Developer · Celsius Online 2018–19

First professional game-dev role on live mobile games with millions of users. Mastered a 500+ file undocumented codebase across C++, ActionScript, C# and NodeJS; led a critical iOS platform update and fixed a PvP exploit.

Earlier: Data Scientist at BIOptimize (2015–17) and Lead Web Developer Intern at Straformation (2014).

Independent Game Developer & Tech Entrepreneur · Bretzel Studio 2015–now

20+ published games and freelance missions. Doge To Mars - 25K organic downloads, 4.9★ on the App Store, NFT integration, solo. Rody Collection - Unity remake of Atari ST's Rody & Mastico, featured by Benzaie with 800K+ views. Teach Unity and C# at Futurae Private School.

// SELECTED WORK

Sorolla Palette SDK

Unity mobile-publisher SDK.
github.com/sorolla-studio/sorolla-palette

Happy Snake 3D

Sorolla mobile game - App Store & Google Play.

Unity CI/CD Template

GitHub Actions · GameCI · Fastlane · Firebase.
github.com/LaCreArthur/unity-fastlane-ci

Rody & Mastico Collection

Unity remaster + level editor.
